

SENSORY BOXES

Creating sensory boxes is a fun way to explore different materials, colours and textures. You could use a cardboard box, a shoe box or even a cereal box. Fill your boxes with things you can find around the house like; fuzzy blankets, bouncy balloons, silky scarfs, crinkly tissue paper and woolly jumpers.

Encourage your little one to explore the materials inside the box.

Play a game of taking all the objects out of the box and putting them back in.

What did your little one enjoy the feel of the most?

You can even wear your sensory box with the help of some tape!
